For Immediate Release

Armstead, Mancosky and Parker Named Vice Presidents of HDI

Rome, GA- Hydro Dynamics, Inc. (HDI) names three new Vice Presidents today:

- Mr. Daniel Armstead, Vice President of Sales Engineering.
- Dr. Douglas Mancosky, Vice President of Research and Development
- Mr. Derek Parker, Vice President of Operations

With over 30 years of combined experience in cavitation and the ShockWave Power technology, Mr. Armstead, Dr. Mancosky and Mr. Parker possess a diverse and vast set of skills and knowledge. Their combined expertise allows HDI to work seamlessly in multiple industries throughout the sales and development process.

Hydro Dynamics, Inc. is extremely excited about the potential of 2013 as it enters several new markets and introduces a new design of its patented ShockWave Power Reactor (SPR). This new team will be integral in executing the business plan for 2013 and beyond.

About Hydro Dynamics

Hydro Dynamics, Inc. (www.hydrodynamics.com) of Rome, GA USA is the developer of a patented process intensification technology enabling customers to solve critical mixing and heating problems. Hydro Dynamics's equipment is operating in diverse markets including biofuel production, chemical manufacturing, refinery services and food processing. The ShockWave Power technology can allow customers to significantly increase quality and production while simultaneously increasing profits for many processes.
